

## **Leoni: Vocational Training with Distinction**

State Awards for Apprentices from plant Roth

**Roth, 24 February 2023 – Leoni apprentices from the location in Roth graduated from vocational college with six state awards as a special recognition from the local government for outstanding achievements in vocational college and one Toolcraft industry award: The electricians, industrial mechanics, mechatronics and technical product designers have successfully completed their apprenticeships with remarkable results at Leoni in Roth.**

When our apprentices started on 1 September 2019 with their introduction and team building weeks, no one could anticipate that the corona pandemic starting in spring 2020 would also mess up vocational training. During the lock down, the Technical Training Center was closed for approx. 15 weeks and our apprentices were forced to home office. Thanks to the commitment of the vocational trainers' team and the provision of IT equipment and digital learning opportunities by Leoni, this worked out well.

The major practical part of the vocational training is held in the Technical Training Centre in Roth. After the extensive exam preparation, the exam was also taken here. The best conditions for the apprentices for an optimal start into working life.

The apprentices who have successfully completed their training:

- Electricians: Jan Buchner, Jonas Knaeblein, Mario Meixner (all three state awards)
- Industrial mechanics: Julian Endres (state award), Fabian Loy (state award & Toolcraft industry award), Mario Gussner, Daniel Huebner
- Mechatronic: Jakob Koeglmayr
- Technical product designer: Leon Bensch (state award).

- Also on the photo: the vocational trainers Martin Biller, Harald Lehner, Boris Mazebura, Markus Trost

### **About the Leoni Group**

Leoni is a global provider of products, solutions and services for energy and data management in the automotive industry. The value chain ranges from standardized cables and special and data cables to highly complex wiring systems and related components, from development to production. As an innovation partner with distinctive development and systems expertise, Leoni supports its customers on the path to increasingly sustainable and connected mobility concepts, from autonomous driving to alternative drives as well as charging systems. To this end, Leoni is developing next-generation cable solutions and wiring systems that reduce complexity and enable higher levels of automation, for example through zonal architecture. The market-listed group of companies employs about 100,000 people in 28 countries and generated consolidated sales of EUR 5.1 billion in 2021.
