

Aldo Kamper will be leaving Leoni AG effective 31 March 2023

The Supervisory Board will be commencing talks immediately on settling his succession

Nuremberg, 30 January 2023 – The Supervisory Board of Leoni AG today accepted Aldo Kamper’s wish to leave the Company effective 31 March 2023 and to resign his mandate as Chief Executive Officer (CEO) as well as the related offices within the Leoni Group with the intention of taking on a new task soon.

The Supervisory Board will be commencing talks immediately on settling his succession. Chief Restructuring Officer (CRO) Hans-Joachim Ziems, appointed on 9 January 2023, continues to lead the negotiations on refinancing.

“I very much regret that Aldo Kamper will be leaving the Company,” Klaus Rinnerberger, Chairman of the Supervisory Board, said. “He took over at Leoni AG in a difficult situation and led the company through extremely challenging times. Recruited to manage the planned growth, he instead proved himself as a crisis manager. I wish him every success in his new job and all the best personally.”

Aldo Kamper joined Leoni AG as CEO in September 2018. “It was anything but easy right from the start,” Kamper said. “We confronted the crises with enduring team spirit. I would have liked to complete the restructuring of this promising company as CEO. However, the challenge I have been offered represents consistent continuation of my career. I could not say no to that.”

About the Leoni Group

Leoni is a global provider of products, solutions and services for energy and data management in the automotive industry. The value chain ranges from standardized cables and special and data cables to highly complex wiring systems and related components, from development to production. As an innovation partner with distinctive development and systems expertise, Leoni supports its customers on the path to increasingly sustainable and connected mobility concepts, from autonomous driving to alternative drives as well as charging systems. To this end, Leoni is developing next-generation cable solutions and wiring systems that reduce complexity and enable higher levels of automation, for example through zonal architecture. The market-listed group of companies employs about 100,000 people in 28 countries and generated consolidated sales of EUR 5.1 billion in 2021.
